## LKG TERM BOOKS

### Textbook

The Peek-a-boo Term books series for LKG comprise of three subjects– English, Mathematics and EVS. The contents have been developed by identifying a familiar easy-to-grasp approach to presentation using a play-way methodology, so that the learning process remains buoyant and cheerful.

English is a well researched framework for teaching the letters of the English alphabet. The contents are designed to help early learners, entering the formal classroom environment for the first time, to enjoy the process of learning.

Mathematics book is a precursor to formal numerical understanding and applications. The learners are introduced to the pre-concepts of mathematical understanding through pattern making with lines, followed by a grounding of pre-number concepts. These have been innovatively conceptualized through a variety of activities, like colouring, sticker pasting, tracing out on given outlines.

EVS provides a well-researched framework for presenting an inclusive and realistic curriculum which has been arrived at, after much deliberation. The vast gamut of exercises and fun drills that are peppered throughout the series, follow a systematic and scientific route. This approach is deliberately fine-tuned to awaken curiosity in the user, hone his/her observation capacities, to tap practicum for contextual use.

NEP aligned Teacher's Resource Kit

A series of beautifully illustrated science educational charts helps learners to remain excited and engaged in the classroom. These visual delights bring the actual fields of lessons on charts in the classroom which may be otherwise difficult to visit. These represent the print pages of a book. As a boost to the learner, there are motivational stickers to acknowledge the laudable achievements of the bright pupils. These also promote good behaviour, hard work and discipline with positive encouraging messages.

## WATER CONSERVATION

- Turn off the tap while soaping hands or brushing teeth.
- Make sure to turn the tap off. Dripping taps waste lots of water.
- Save rainwater to water your plants and washing floor.
- Turn off sink tap while scrubbing dishes and pots.
- Water your plants early or late in the day to reduce evaporation.
- Use bucket and mug instead of shower for bathing.
- Wash car and bikes on the lawn to water grass at the same time.
- Use a pan filled of water instead of running water while rinsing vegetables and fruits and then use that water for cleaning floor.
- Use a broom not a hose, to clean paths and driveways.
- Use the leftover water of your tumbler or bottle to water the plant.
- Water the garden using a trigger hose or a watering can. Do not use pipes for watering plants.
- Get dripping taps and leaking pipes repaired.
